- CO.NA.RI.GE.-Comitato Nazionale Ricercatori in Gastroenterologia
- E.U.S. Club.
- E.G.E.U.S.-European Group for Endoscopic Ultrasonography

## **Scientific Activity**

Dr. Marzioni's research activity has focused, since its beginning, on the basic science of the pathophysiology of liver injury. In particular, since 2001, when he started his fellowship at the Department of Medical Physiology, the Texas A&M University College of Medicine and Scott & White Memorial Hospital Health Science Center, the main field of his research has been represented by the study of the cross-regulation by bile acids and nervous and neuroendocrine systems of proliferation and survival of cholangiocytes, the epithelial cells lining the biliary tree.

Since 2001, Dr. Marzioni's research has produced 94 original manuscripts, 13 bookchapters and 125 abstracts.

He serves as ad hoc reviewer for the major gastroenterological and hepatological journals.
